

RANDY FUERTE

Senior Flutter Developer / Mobile Software Engineer

randyfuerte54@gmail.com • +63 998 455 0283 • [linkedin.com/in/randyfuerte-22ab01144](https://www.linkedin.com/in/randyfuerte-22ab01144) • Philippines (Remote – AU-aligned hours)

PROFESSIONAL SUMMARY

Senior Flutter and Mobile Software Engineer with 6+ years of experience delivering production-grade mobile applications across FinTech, eCommerce, Construction Safety and enterprise platforms. Proven track record collaborating with Australian, UK, and global clients – leading framework migrations, improving app performance, and releasing scalable products used by thousands of users. Experienced engineering manager and technical lead with a strong focus on clean architecture, test-driven development, CI/CD pipelines, and team mentorship. Currently operating on AU-aligned hours and available for remote engagement.

CORE SKILLS & TECHNOLOGIES

Mobile Dev

Flutter, Dart, C#, Xamarin, Android (Kotlin), iOS (Swift), React Native

Architecture

Clean Architecture, MVVM, BLoC State Management, Repository Pattern, TDD

DevOps / CI-CD

Bitrise, Firebase App Distribution, Crashlytics, AppStore Connect, Google Play Store

APIs & Data

REST API, GraphQL, Postman, JSON, XML

Analytics

MoEngage, Appsflyer, Firebase Analytics, SonarQube, CodeCov, Sentry, Pendo

Tools

Git, GitLab, Bitbucket, JIRA, Confluence, Figma, Sketch, Android Studio, Xcode,

Visual Studio

Methodologies

Agile/Scrum, Code Review, Unit & Widget Testing (Mockito, Mocktail), Technical Documentation

AI Tools

Claude Code, Claude Cowork, ChatGPT

PROFESSIONAL EXPERIENCE

Senior Flutter Developer (Full-time) – ZigZag Careers – BreadCrumb (Australian Client) – September 2024 – Present

BreadCrumb App – Construction Safety Technology

- Senior Flutter developer for a construction safety application used by Australian construction teams to improve on-site safety, compliance, and emergency response.

- Delivered critical platform features including: Evacuation workflows, Single Sign-On (SSO), Plant Directory for equipment management, and Landscape mode for tablet usability.

- Relunched and stabilised unit testing for legacy codebases; enforced test coverage on all new features and BLoC components.

- Conducted code reviews with a strong focus on data security, performance, and maintainability.

- Collaborated closely with the Product Manager to define and refine acceptance criteria, ensuring high-quality feature delivery.

- Worked AU-aligned hours, actively participating in sprint planning, demos, and stakeholder discussions within an Agile/Scrum framework.

- Leveraged Claude Code and Claude Cowork as day-to-day AI-assisted development tools to accelerate task execution, surface deeper implementation insights, and maintain adaptability to rapidly evolving artificial intelligence technologies within the mobile engineering workflow.

Software Engineer Manager (Full-time) – SM Supermalls – February 2023 – September 2024

SM Malls Online – Polaris

- Development Captain and Manager for the Polaris team – led engineering direction, sprint delivery, and team performance.

- Drove MoEngage campaign implementations for the Marketing team,

generating a total revenue of Php 15M across targeted Android and iOS campaigns.

- Introduced and championed BLoC testing, Repository Pattern, Localisation, and SonarQube – improving code quality and long-term maintainability.
- Served as Release Manager, overseeing Android and iOS production deployments and maintaining a reliable release pipeline.
- Led process improvements, including Git champion initiatives (branch/PR naming standards, commit templates) and data management practices.
- Implemented organic event tracking across both platforms using Firebase Analytics, Appsflyer, and MoEngage; collaborated closely with the Marketing team.
- Mentored direct reports through code reviews, one-on-one sessions, and Confluence documentation of guidelines and best practices.
- Deployed a nationwide epic to production and championed continuous process improvement across the engineering organisation.

Flutter Developer (Full-time) – White Cloak Technologies Inc. – November 2021 – February 2023

UnionDigital Bank | Gecko (February 2022 – February 2023)

- Part of the team that delivered the first mobile digital banking app in the Philippines within 7 months.
- Pioneer developer for UnionDigital-to-UnionDigital, UnionDigital-to-UnionBank, and Bank-to-Bank transfer features.
- POC lead for In-App OTP and blockchain-based identity verification; wrote native Kotlin and Swift code for platform-specific requirements.
- Mentored junior developers and produced Confluence documentation for guidelines and feature specifications.

Captain of production support and deputy SCRUM Master

- Wrote native code using Kotlin and Swift to satisfy platform-specific requirements
- POC lead for the enabler of In-App OTP and verification using blockchain technology
- Lead developer for UD to UBP epic

RMalls+ | Eagle (December 2021 – January 2022)

- Implemented Flutter Web for the Content Management System; delivered Account Recovery and Forgot Password features to production.

Vertex | Daenerys (November 2021 – February 2022)

- Delivered team composition and feedback form features for a cross-platform HR application (Web, Android, iOS).

Xamarin Developer (Full-time) – Londa Online Technologies Inc. – January 2020 – November 2021

- Developed IFXBIT Mobile for cryptocurrency and trading instruments including OHLC chart indicators, oscillators, and custom Android renderers – built from scratch without third-party libraries.
- Implemented real-time quote data binding and full trade transaction lifecycle (creation and execution).
- Handled the creation and execution of Trade transactions
- Developed chart indicators, oscillators, and settings
- Assisted with the construction of the OHLC chart and visual tools from scratch without the use of third-party applications
- Created custom renderers for Android and the process of chart system and life cycle

Web Developer Intern – GData AV Lab Inc. – July 2017 – November 2017

- Delivered a leave management feature into production for an internal HR application; applied modern UX design and performed database management.

Senior Flutter Developer (Part-time) – Socium | Coniq (UK Client) – July 2025 – November 2025

- Led the migration of multiple enterprise-grade white-label mobile applications from Ionic to Flutter, modernising UI/UX and releasing stable builds on Android and iOS.
- Improved app performance, UI consistency, and maintainability across all migrated projects.
- Eliminated legacy APK distribution via Google Drive and introduced

ed a modern, scalable release pipeline.

- Implemented a custom theming structure that supports all clients and reduces duplicated UI code.
- Implemented Bitrise CI/CD pipelines to automate builds of IPAs, APKs, App Bundles, and dSYMs – significantly reducing manual deployment effort.
- Introduced Firebase App Distribution across all client apps with release notes, tester groups, and streamlined build sharing.
- Integrated Firebase Crashlytics with per-client issue workflows; resolved long-standing Firebase Messaging issues enabling image-based push notifications on iOS.
- Implemented a custom theming structure that supports all white-label clients and eliminates duplicated UI code.
- Production releases across 14 apps including: Mall of America (US), WAFI Rewards (UAE), LDO One Wembley Park (UK), Batavia Stad Fashion Outlet (EU), Bergen Town Centre (US), and multiple loyalty apps across Europe, UK, and North America.

Flutter Developer (Part-time) – Casha Inc. – January 2024 – November 2024

Casha Inc – FinTech Application for Philippine Local Government Units

- Part-time consultant who worked with a cross-functional team (including the CEO) to deliver a rebranded MVP in under two months.
- Rebuilt the application from scratch, applying clean architecture, reusable widgets, and BLoC state management.

Casha Loans

- Extended the Casha Inc codebase to create Casha Loans; implemented BLoC state management and Repository Pattern for front-end data management.
- Completed repository update and launched to both app stores within 2 months.
- Delivered biometrics login, multiple transfer methods, and multi-currency transaction history.

LCS VIP – Internal Transactions Application (Confidential)

- Built from scratch: Instapay and PESONET money transfers, withdrawal, transaction history with filters, biometrics, MPIN, and offline-capable local caching.

MCS-FM – Political Campaign Application (Confidential)

- Built from scratch with offline data syncing, biometric authentication, local database storage, and social media messaging integration for remote-area use.

Lead Flutter Developer (Part-time) – Mobii – December 2022 – November 2023

- Lead Flutter developer guiding a mobility-focused start-up from MVP to production.
- Proposed modern digital identity technology for KYC processes, directly contributing to the company securing investor funding.
- Implemented Xendit for payment transaction processing; maintained unit test coverage at 98% using Mockito and CodeCov.
- Conducted developer interviews and onboarded successful Flutter engineer candidates.

Flutter Developer Consultant (Part-time) – Turismo – March 2022 – July 2022

- Part-time consultant for a tourism booking platform (hotels, events, flights); helped secure funding by delivering the CEO-requested MVP on schedule.
- Implemented Flutter with null safety, BLoC state management, TDD, Clean Architecture, and Figma-to-code UI delivery.

EDUCATION

Bachelor of Science in Information Technology – Major in Human Computer Interaction

Technological Institute of the Philippines | Graduated 2018
